Nifty Notion Profits, Yours for the Taking!

Are you new to the incredible new world of Notion Templates?

If so, don't feel discouraged... so was I when I first heard of them a few days ago!

But I'll tell you this... the sheer range and depth of the Notion Template community is... literally jaw-dropping.

For example, consider **Reddit**. Here's the Notion community

numbers:

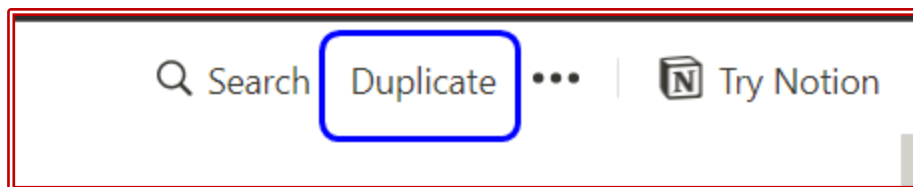

Reddit Notion – 274K Members (that's over ¼ of a Million peoples)

Reddit Notion Layouts – 12.5K people (and lots of free templates shared!)

Reddit Notion Templates – Only 8.5K people buuuut here's the first thing I saw when I checked it out at 1:31am:

Build your Blog - The Basics Workbook which then takes you to the author's Gumroad page over HERE. And yes, while you can pay zero for it, it might be a nice gesture to offer something a wee bit more!

Here's why this is kinda sorta groovy: Anytime you gain access to a Notion template (aka free or paid), you'll see this adorablez thingee in the upper right hand corner:

Now! If you already know about Notion you'll already know how to basically login into Notion and set up your own account.

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

If not, here's where you login: <https://www.notion.so/login>

After creating your account, simply duplicate any offered template and it will be immediately copied to your account.

That's so important, let me repeat it for the peoples in the back of the room:

After creating your account, simply duplicate any offered template and it will be immediately copied to your account!

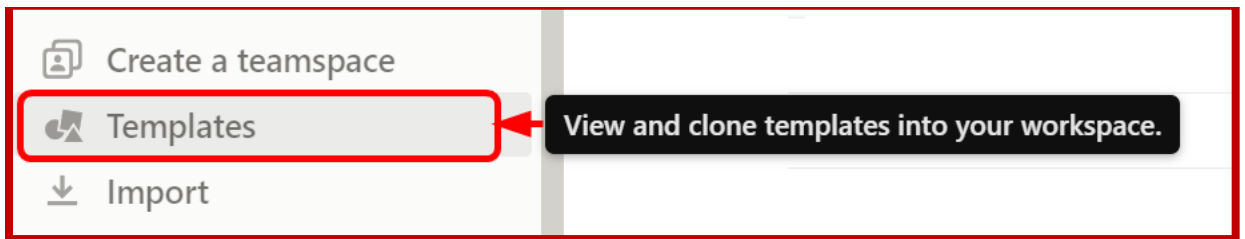

*This is beyond wondrous because it enables you to play with something *already* made and working. Thus, you can see what happens if you change the text here, or toggle that thingee to the OFF position there... and **take it at your OWN pace.***

And here's how!

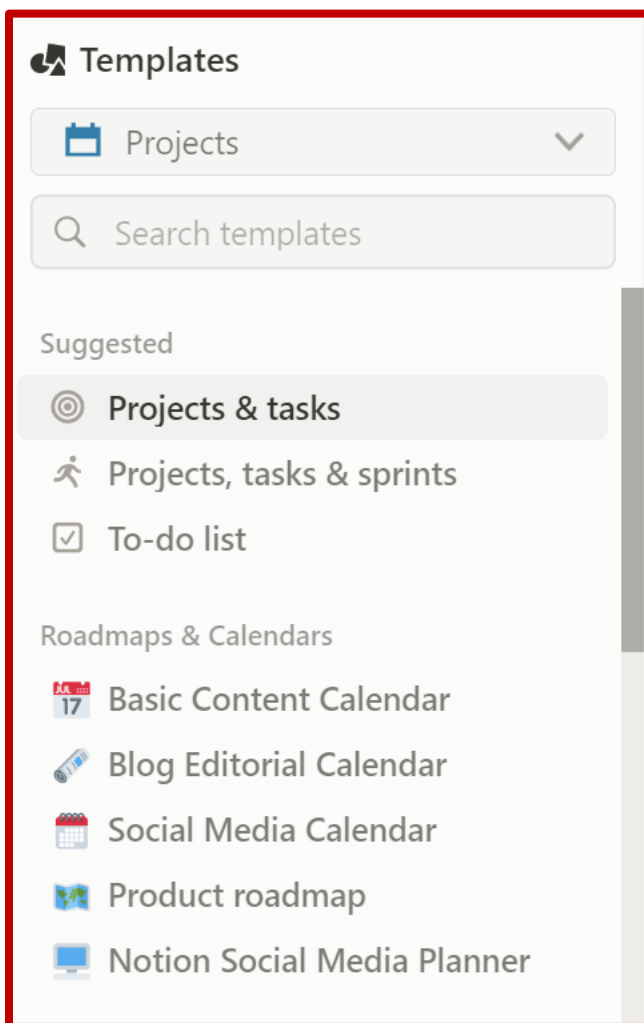

Look towards the bottom of your Notion workspace. You'll see something like:

Click on that Templates link and you'll see:

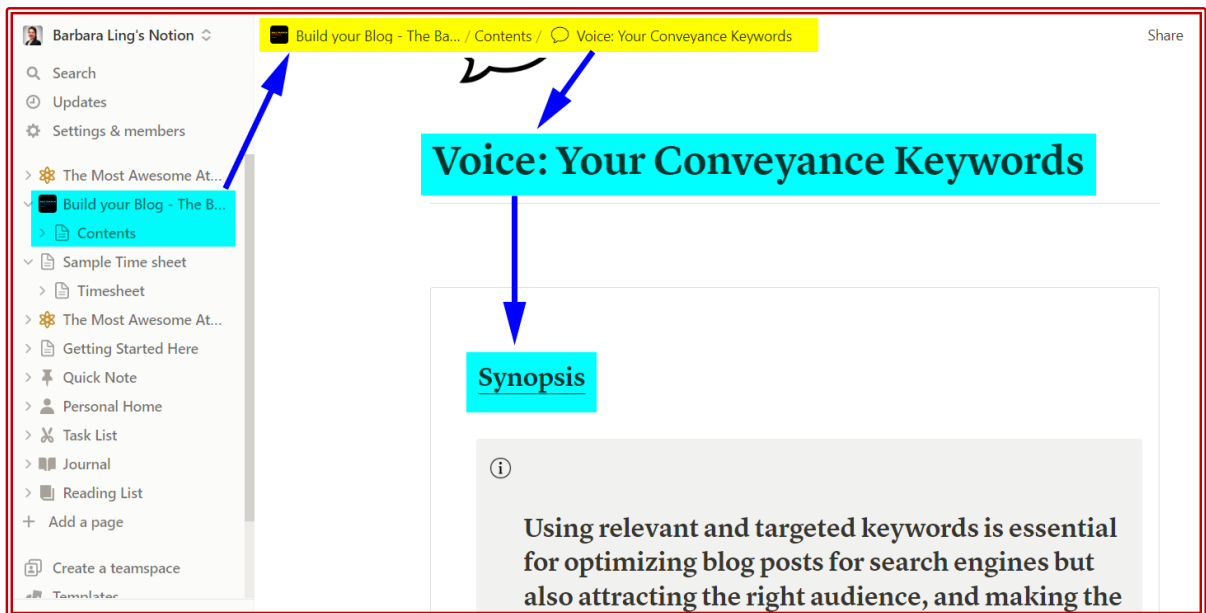

*I'm going to select **the Build Your Blog template** which*

sometimes shows up... and sometimes doesn't.

Anywhos!

*So! Let's return back to our **Build Your Blog Basics Workbook** – after you duplicate it in YOUR space, you'll see something like:*

You can see the trail of web breadcrumbs at the top in yellow (so you can always keep track of what level you're on), the specific breakdowns of content chapters and more.

I cannot emphasize enough how helpful this can be when learning something like this on your own! If you manage to smooshilate up your copy of the template beyond recognition, have no fear – just delete the smooshup, copy

the original template once more to your workspace and start again.

Wow – that was a wee bit of a digression, aye? Where was I? Oh yes! Reddit!

Reddit NotionSoApp – A more... structured... sub-reddit than the main Notion area. When I checked it out, I saw:

These pages will highlight to you even more that:

- Lots of people will use Gumroad to sell their Notion Templates...

and

- You can create Notion Templates to just about Anything Imaginable!

And you know what that means, right?

It means that no matter what your personal niche might be, *you* (yes you!) *YOU* can start off with creating simple Notion Templates!

With me so far? Excellent!

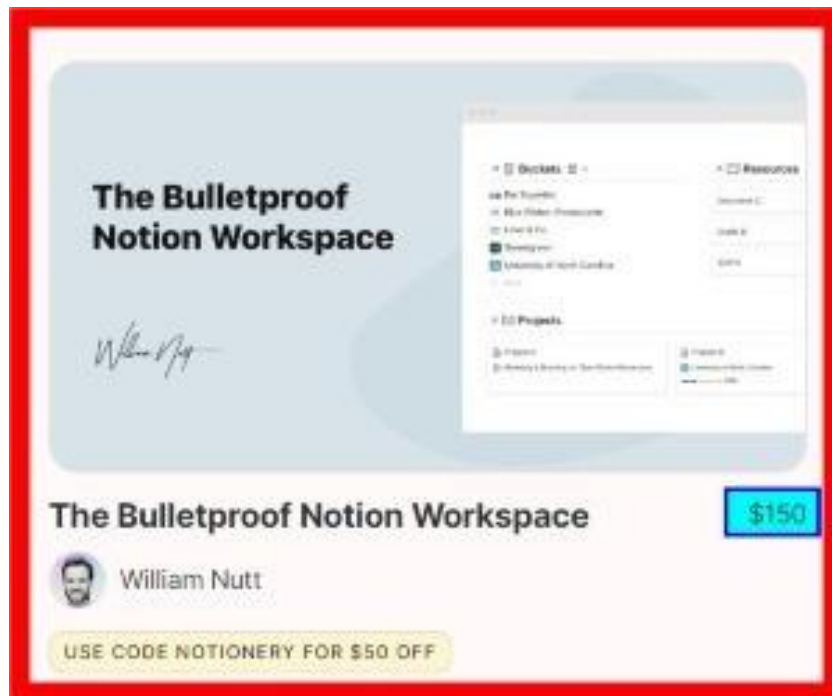

From there, get used to the process, list them at the places I'll be

See those cyan highlighted prices of \$150 and \$70?

Becoming a Master of Notion Templates allows you to create highly useful and efficient frameworks with clear, step-by-step instructions....

(Think "Clarity" for your customers! ← That is what top customers pay you for!)

... And that skill allows you command the *best* price for your services (assuming you are known as the *top* Provider of Choice within whatever your niche is).

Clarity.

Truly - *that* is what people pay for buying Notion Templates.

They're buying the already done-for-them path they crave to follow... so they don't have to figure it out themselves.

That's so important, let's repeat it once more!

*They're buying the already done-for-them path they

Powerful stuff and motivation right there, aye? So long as you know *how* to deliver that clarity to your customers, you will have a built-in customer base that never will go away!

And with that as a teeny tiny introduction, let's now fling ourselves off the Notion Templates cliff and build our wings on the way down...

... and zoom right into:

Step 1.) Uncover The EIAs of Notion Templates

What is an EIA, I hear you ask?

Why, 'tis something I just made up... and it stands for:

- Easy
- Intermediate
- Advanced

A bullet-point poet, I never was. ☺ So let's move now to:

Easy

So you've heard of all the coolios thingees regarding Notion Templates and want to dip in a toe (or even 10!). What's the easiest way to do that?

I'd have to say... the easiest way (of course) is to first log in. 😊 And you can get all the nifty step-by-step ways to gain nice easy info over at:

- [Notion for Personal Use](#)

What I really like about this site is the case studies that are subtly woven into the content! Consider, for example:

Trip reviewer Ceci never forgets a good idea at home

An international travel blogger, Ceci's notes need to go with her. Using an organized note-taking system in Notion, she keeps track of everything she's supposed to record and

review for her trips, while also capturing thoughts along the way.

[Read Ceci's story](#) →

And

Human rights activist Amira keeps many plates spinning

Amira, an entrepreneur and humanitarian, uses Notion to organize every facet of her life — the company she runs, global travel, and the Tunisian recipe book she's writing with her mother.

[Read Amira's story](#) →

And

Freelance writer Swapna keeps tabs on all her assignments

A space and science writer, Swapna usually works on several pieces at once, every week. With Notion, she's able to build detailed lists of to-do's for all projects while tracking the status of each one through her process.

[Read Swapna's story](#) →

Etc.

Even more stories are found over at:

- [Even More Customer Stories! \(okay yes, I did make up that title\)](#)

And yep – the ways people like you and me can use Notion are truly astounding indeed. You'll greatly enjoy how it's all written (especially [Buffer's story](#), which started off with:

"...Buffer's internal docs needed a facelift. New hires struggled to find company policies and processes, which made onboarding a mess. Existing employees struggled to do their work as every task required a lengthy information-finding session, wasting time trying to find elusive decks and docs...."

Saying **"Buffer's internal docs needed a facelift."** Is akin to saying **"mere mortals require oxygen to exist"** or **"rotating the tires on the car does NOT mean simply driving said car, secure in the knowledge that said tires are rotating."**

The same thing could also said to be true of Feedly's external how-tos... but as I am digressing more than paparazzi do whenever they spy Tom Cruise running with his hands up... let's continue. 😊

So just *why* did the guy even consider writing this down?

Well, because of a reason I can certainly relate to:

*“...I’ve got a track record of spotting **game-changing productivity tools**. Omnifocus in 2008. Evernote in 2010. Airtable in 2015. My obsession with productivity is quite simple. **When I’m not organized, I’m anxious. And when I’m anxious, I don’t show up for the most important***

parts of my life: *my family, my health, and my business. Notion finally gave me the pieces to unify all my disparate systems...."*

So if you find yourself with similar symptoms of anxiety and the like... perhaps Notion templates are for you. Inner Peace! I'm beginning to think I can use this resource as well. Interesting.

And now that you've had a good solid intro to easy aspects of Notion templates, let's move to:

Intermediate

If you invested in other Notion goodies, you'll see that one of the easiest ways to create simple Notion Templates is to just ask ChatGPT to generate the content for you!

For example, let's say that you wanted to create a Notion Template about a Sub-niche Sub-niche of Dog Training. ChatGPT returned the following 10 sub-niches for Dog Training itself:

- Aggressive behavior modification

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

- Agility training
- Behavior training for reactive dogs
- Obedience training
- Puppy training
- Search and rescue training
- Service dog training
- Therapy dog training
- Training for specific breeds
- **Trick training**

I love the particular sub-niche for Trick Training, and asked for 10 sub-niches of *that*. That resulted in:

- Advanced trick training
 - Basic trick training
 - **Freestyle trick training**
 - Trick training for agility dogs
 - Trick training for movie and TV dogs

- Trick training for working dogs (e.g. search and rescue, police dogs)

Freestyle Trick Training! And when I asked ChatGPT to create my Notion Template *on* Freestyle Trick Training, I received back great content including:

create each component of the template, step by step, and paste in the information ChatGPT offers you. Additionally, you could go to YouTube and search for:

- NICHE (in our case, 'freestyle trick training for dogs')

And include some of the resulting videos into your Notion Template.

And yep, those would be considered rather easy templates to create! After all, they include only text (or videos or images etc.).

When you move to Intermediate Notion Templates, you can choose to learn how to:

- Automate work with repeating database templates
- Automatically generate blocks, pages and more with the click of a button
- Break tasks into manageable steps with sub-tasks and

dependencies

- Build a website with Notion in seconds, no coding required
- Get useful insights with workspace and page analytics
- Organize, manage, and track all your work with a personal dashboard
- Understand the best ways to use simple tables in your Notion pages (and when not to)
- Use Notion AI to extend your impact

And more. That “more” can be found over at the:

- Notion HelpCenter Guides

Quite helpful you’ll find those to be!

Taking a brief moment to see where you are, you’ve just learned about Beginner ideas regarding Notion, followed by Intermediate. So yep! It’s now time to mosey on by:

Advanced

What might “Advanced” be when talking about Notion Templates?

Well, it could be several things....

... Like fully completed and integrated templates as you’ll see! Keep in mind – most if not all lead to digital product creators (I mean, Notion Templates ARE digital products, correct?) at GumRoad, and some of the pricing is rather fascinating indeed.

But if you **really** want to rock the yacht, consider...

Notion Templates has a wrapper to OpenAI.

Did you catch that? Let me repeat it once more...

Notion Templates has a wrapper to OpenAI!

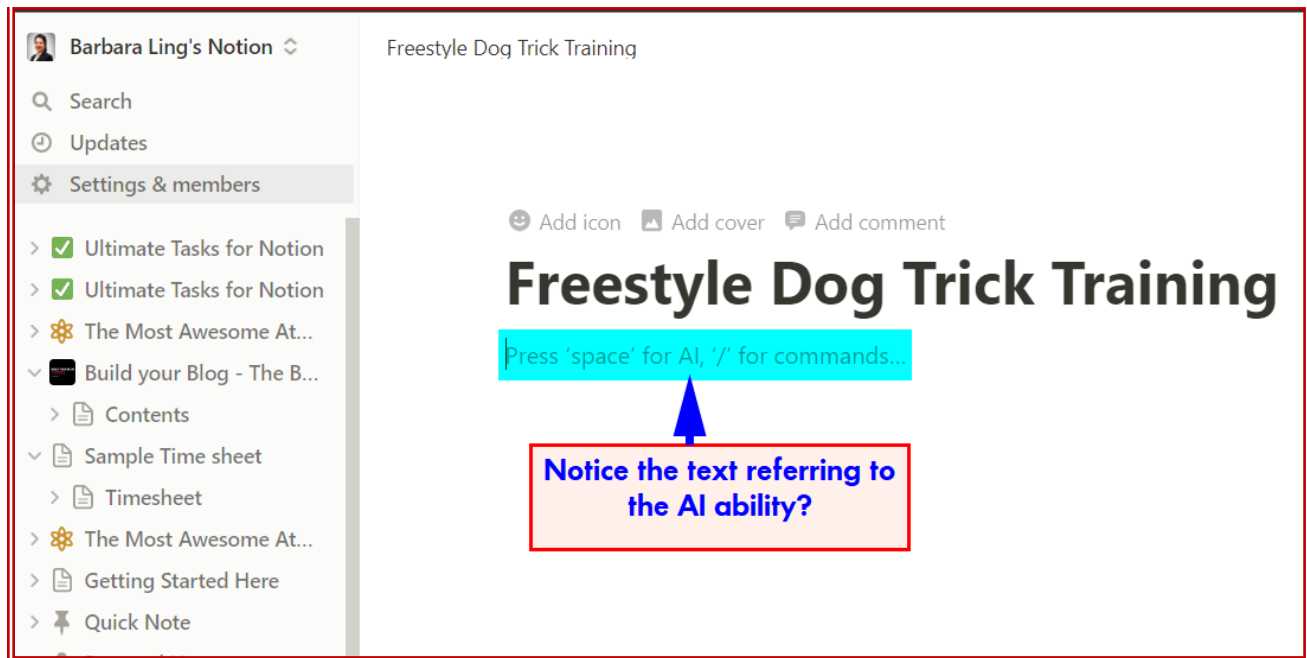

This means that not only can you have AI create content for you, you can create a NEW page entirely and then ask for AI to create the new **template** for you as well.

Here's how.

First, create a new page by clicking on "New Page" on the sidebar, and typing in your template name. (in this example, let's call it "**Freestyle Dog Trick Training**"). You might see:

And like my text shows... notice that “Press space for AI” message?

When I typed “/”, the next display was:

I wrote out:

- Please write the entire contents to a Notion Template for Freestyle Dog Trick Training.

Then I sent that to their AI.

Following is a snippet of what was returned.

Freestyle Dog Trick Training

Freestyle Dog Trick Training

Introduction

Freestyle dog trick training is a fun and creative way to bond with your dog while teaching them new skills. This Notion template provides a framework for organizing your training sessions and tracking your progress.

Goals

Before you start training, it's important to set goals for you and your dog. Consider what tricks you want to teach your dog, what level of difficulty you want to achieve, and what your end goal is. Write down these goals in the Goals section of this template.

Training Sessions

Use the Training Sessions section to plan out your training sessions. Record the date, time, location, and duration of each session. Take notes on what tricks you worked on, what progress your dog made, and any difficulties you encountered.

Tricks

The Tricks section is where you can keep track of the tricks you're teaching your dog.

Isn't that incredible?

Now, true. I would still have to actually ADD those sections to my final Notion Template. **But the *structure*, the ideas, etc. – the AI has already presented to me.** And all I would have to do is build it out.

Let's take a moment to see where we are, shall we?

You've learned a bit about beginners Notion templates, intermediate and even advanced. Yay!

Now, let's get some grand ideas for how to discover template concepts that almost certainly would sell!

Move now to:

Step 2.) Discover Hungry Niche Questions

The best way to come up with niche ideas for Notion Templates is to first discover what questions are currently popular within your

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

niche... and then subniche those 10 times and then 10 times again.

It's actually rather simple to do!

You can visit Google and ask:

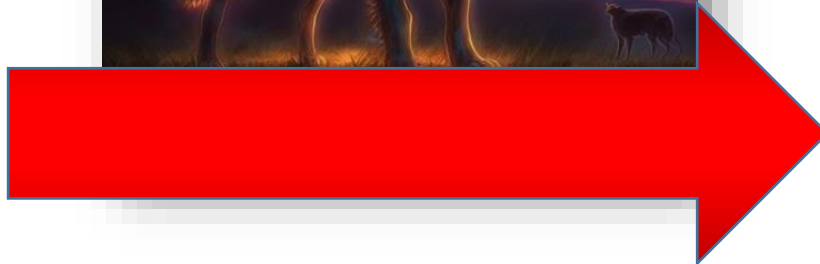

- Populate NICHE questions

Staying with our last example of dog training, I would search on

- [popular dog training questions](#)

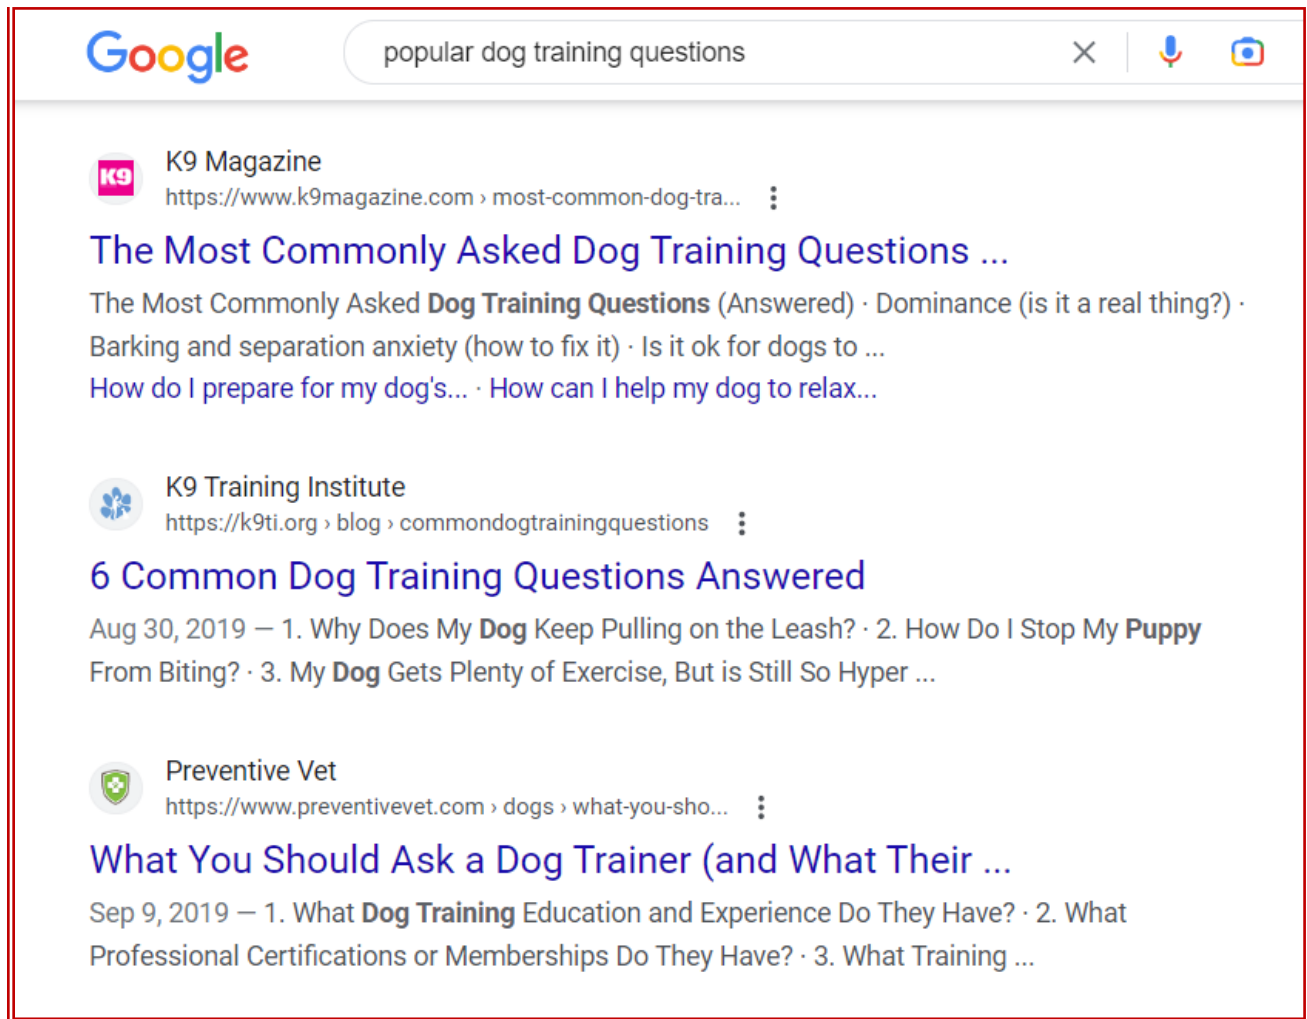

Yep, I know... it looks rather staid, but let's see what's returned, ok?

Some resources include:

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

And clicking on, say, the first response, I might see the question:

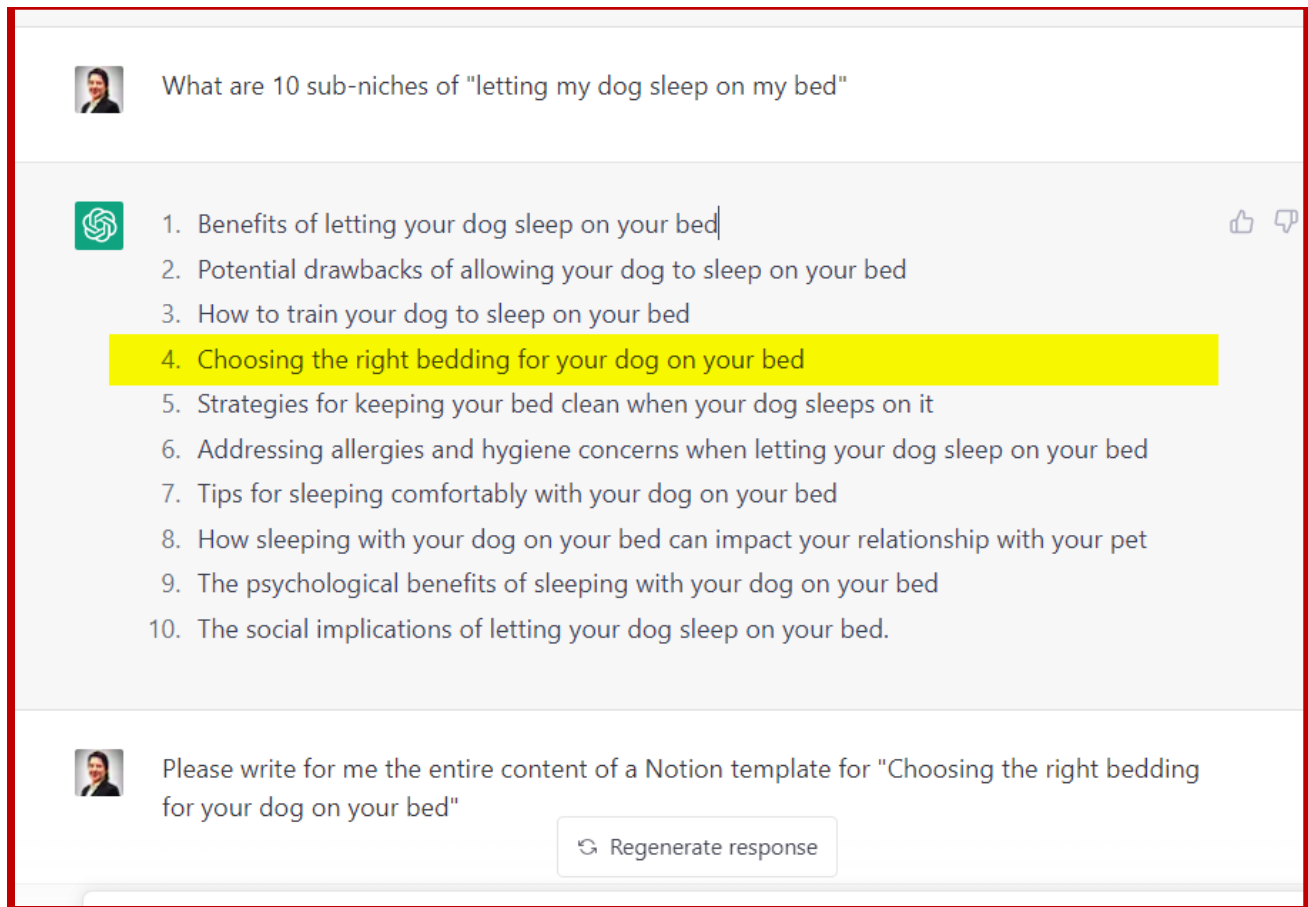

- **“Should I allow my dog to sleep on my bed or should I have her sleep elsewhere?”**

Armed with that information, I can now return to ChatGPT and ask:

- **What are 10 sub-niches of "letting my dog sleep on my bed"**

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

What are 10 sub-niches of "letting my dog sleep on my bed"

1. Benefits of letting your dog sleep on your bed
2. Potential drawbacks of allowing your dog to sleep on your bed
3. How to train your dog to sleep on your bed
4. Choosing the right bedding for your dog on your bed
5. Strategies for keeping your bed clean when your dog sleeps on it
6. Addressing allergies and hygiene concerns when letting your dog sleep on your bed
7. Tips for sleeping comfortably with your dog on your bed
8. How sleeping with your dog on your bed can impact your relationship with your pet
9. The psychological benefits of sleeping with your dog on your bed
10. The social implications of letting your dog sleep on your bed.

Please write for me the entire content of a Notion template for "Choosing the right bedding for your dog on your bed"

Regenerate response

See that highlighted "Choosing the right bedding for your dog on your bed" sub-niche?

More importantly, see the question I asked right below that?

That

- ***Please write for me the entire content of a Notion template for "Choosing the right bedding for your dog on your bed"***

Ask ChatGPT, and ChatGPT responds! The only thing wrong with the response was it wasn't interactive at all (aka, no areas for customers to add their own take). So I then asked:

Another Great Power Report by DAB Coaching!

Awesome Notion Subject Ideas YOURS for the Taking!

- ***What kinds of customizations could a customer want in this template that they could add on their own?***

And voila! Look what was returned!

Here are some customizations a customer could make to this template to fit their specific needs:

1. Add links or images to specific products they are considering for their dog's bedding.
2. Create a list of pros and cons for different types of bedding materials to help make a decision.
3. Create a table or database of different dog bed options with columns for size, material, price, and other important factors.
4. Add a section for tips on how to encourage their dog to use the new bed, especially if the dog is used to sleeping in their owner's bed.
5. Create a checklist of things to consider before making a purchase, such as the dog's weight, sleeping habits, and any health issues.
6. Add a section for reviews or recommendations from other dog owners to get an idea of which beds have worked well for similar dogs.
7. Include a budget tracker to keep track of expenses associated with purchasing bedding for their dog.
8. Add a section for notes on the specific needs of their dog, such as if the dog requires extra support or has allergies to certain materials.
9. Create a page for recording measurements of their bed and their dog to ensure the bedding they choose fits properly.
10. Add a section for tracking the progress of training their dog to use the new bed, including any setbacks or successes.

I could then take these inputs and design them within my own Notion Template.

Pretty cool, huh?

Let's take another moment or 39 to pause and see where you are, alrighty?

You now know how to drill down to really niche aspects of popular questions or goals that a customer might have.

Now, let's move to another topic near and dear to many entrepreneur's hearts! Move to:

And finally, now that you have all of the prior information under your belt....

Wouldn't it be grand to discover MORE places than simply Etsy to sell your templates?

'course it would! Move now to:

Step 4.) Selling` Your Notion Templates

The majority of the following material was taken from Gridfiti's "[15 Places to Sell Notion Templates](#)". Visit this site to get the complete rundown of each marketplace.

Official Notion Template Gallery

Notion has a huge online presence — the Notion subreddit alone has over 250,000 members. While Notion receives hundreds of template submissions each month, it's worth submitting your

template for the chance to reach thousands of Notion users.

Notion's application requirements are pretty strict. You must clearly state your template's intended audience and what makes it unique from similar templates. You also need to provide demos, samples, and instructions. You can find a full list of [selection criteria](#) on Notion's website.

Gridfiti

They promote a range of digital products on our blog, including Notion templates, wallpapers, iOS icon packs, and more.

With proven search traffic, you'll be able to get your templates in front of the eyes of many Notion users looking to level up their workspace.

Notion Plaza

Notion Plaza is a growing marketplace that lists many free and paid third-party templates, widgets, and tutorials for new users.

Plaza is the brainchild of Pascio, a big player in the Notion space with over 30,000 followers on Twitter.

Notion Utopia

Notion Utopia is a popular Notion marketplace with hundreds of custom templates for sale. It also offers a range of icons, tutorials, and avatars.

Notion Utopia gives sellers a lot of freedom on their Creator Pages — you can customize the layout, add blog posts, showcase reviews, and more.

Notion Everything

Notion Everything is one of the biggest Notion template platforms, receiving over 40,000 monthly visitors. You can have your products appear alongside over 250 other templates and feature in Notion Everything's newsletter, which has over 5,000 subscribers!

A clickthrough rate (CTR) of over 20% means tons of Notioneers will see your product.

Notionery

Notionery is a creator-driven marketplace showcasing over 300 templates from over 100 creators. Since it launched, Notionery has received over 4,000 customers. Aside from templates, Notionery's products include tutorials and Notion apps.

Notionery has a huge audience and receives hundreds of template submissions. While there's no guarantee your template will be featured, it's well worth submitting your product to Notionery to reach a wider audience.

In addition, Notionery offers one of the smallest affiliate commissions of any Notion marketplace or listing site.

Prototion

Prototion is a large marketplace with over 1,000 free and paid Notion templates to download. When you join the Prototion community, you can get access to its Slack channel.

This includes Q&As with Notion experts and feedback on your templates as well.

Notion Joy

Notion Joy is an up-and-coming marketplace. It's always accepting new free and premium templates.

One of Notion Joy's selling points is its fast support response times — contact Notion Joy through its contact page or Twitter, and a staff member will get back to you within one business day.

Notion Pages

Notion Pages was created by a passionate Notion user looking to encourage others to be at their productive best.

Interestingly enough, Notion Pages doesn't feature paid templates. Thus, it becomes an excellent site to share in-progress Notion projects to see what other users and creators think.

Product Hunt

In a nutshell, Product Hunt uses upvotes, downvotes, and bunches of other votes (exaggeration) for its listings.

Products submitted to this site receive upvotes from other users. The more upvotes and comments a product has, the higher it's listed and the more traffic it'll get.

Keep in mind that Product Hunt only links to external products and doesn't allow selling through its site.

Gumroad

Those who aren't familiar with W+ or JVzoo might consider a Gumroad storefront to be essential essential if you plan to sell your templates through marketplaces.

Gumroad can be a significant source of traffic and income for Notioners, being its one of the world's largest marketplaces for digital products.

Lemon Squeezy

Lemon Squeezy is a newer player to the digital storefront space and has a sleek and intriguing interface to sell templates.

It also boasts a competitive fee structure and robust analytics features empower sellers to increase their bottom line, monitor their store's performance, and optimize their sales strategies.

Etsy

Etsy is a hugely popular place to sell Notion Templates. Originally hailed as a creative arts selling site, it now allows for digital

products as well.

Ko-fi

I first heard about Ko-fi as a more of a community of sorts, but one where people could sell their digital artworks and also network closer to their fans.

You can also donate to others via their “Buy me a coffee” link.

What else can you do?

Well now, how ‘bout:

Notion Templates and ChatGPT

Appendix 2 – AI Art!

Speaking about AI and affiliate marketing... think on your blog, and If you chose to take advantage of this!

- <http://askblings.com/kurtprompts>

This site is unbelievably grand (and free!) – it provides you with a HUGE number of AI Art (and ChatGPT!) prompts as well. You'll see:

The screenshot shows the 'The Prompt Silo' website. At the top, it says 'The Prompt Silo from Kurt Melvin and Pheeds.com' and includes links for 'SEO Silo' and 'Content Silo'. A blue box at the top right says 'Be sure to bookmark this page.' Below this is a search bar with the placeholder text 'Open Midjourney/Discord Parameters'. A text input field contains the prompt 'create a list of keywords to use for event for xxxx'. Below the input field are buttons for 'Copy', 'Clear', 'MJDisc', 'PheedsDisc', 'Your MJ', 'MJ All', 'STBL DIFF', 'PlayGround', and 'Leonardo'. A row of buttons includes 'BlueWillow', 'Futurepedia', 'HOFv3', 'HOFv4', 'ChatGPT', and 'Join K&Q + MJ'. The main content area is a grid of categories with dropdown arrows: Nature, Trees, Plants and Flowers, Wood and Paper, Metals, Gemstones, Fog Snow and Ice, Energy, Fur and Hair, Fabrics and Cloth, Food, Homes and Buildings, Famous Artists, Cartoon Artists, Comic Artists, Anime & Manga Artists, Contemporary and Modern Artists, Creepy Artists, Cubist Artists, Fantasy Artists, Figurative Artists, Impressionist Artists, Nature and Landscape, Art Styles (Selected), Art Styles (All), Film Styles, SciFi Film Styles, Film Director Styles, Cartoon Publisher Styles, Animation Studio Styles, Animated Film Styles, Comic Publisher Styles, Anime & Manga Publisher Styles, Photographers, Kings & Queens VIP Exclusives, Colors, Time Periods and Eras, Cameras, Camera Angles, Camera Distance, Lenses F1 & Pixels, Film Stock, Lighting, Emotions and Expressions, and Detailed Adjectives. The 'Kings & Queens VIP Exclusives' section is highlighted with a yellow border.

Everything EXCEPT the purple area on the right is free! It will provide you with dozens of prompt examples that will give your images an incredible look and feel you could never have imagined

Your Special Invitation to Join an Exclusive Private VIP Club with a Focus on Fast, Easy, Effective, Cheap and Free Ways to Create Content and Make Your Own Products

Hi and welcome,

This page is all about making content and creating your own products. The fact is, the faster, cheaper and better you can produce quality content and products, the more opportunities you create for yourself.

I started SEO and building content sites in 1996, before Google even existed. I was one of the first people to create keyword research tools. I also pioneered many different ways of creating all sorts of content over the years.

You will discover methods that have worked the entire time, as well as brand-new strategies for using the latest artificial intelligence tools to create amazing content and product opportunities for online business people.

The vast **quality** of **>THUD!<** that you'll receive is truly beyond description (*Kurt is one of those Internet old-timers like me – back when the Internet became a thing, nobody ever thought of charging peoples for what they knew.*

It's probably one reason why he's charging the ridiculously low price of \$37 (for only 1 time at that!) for everything you'll see.... Truly astonishing).

Read all about it over at:
